SUMMARY

Flutter developer with strong experience in building scalable, cross-platform mobile applications. Proven expertise in implementing clean architecture, working in remote teams, and integrating complex features like payment gateways and real-time notifications. Passionate about UI/UX, performance optimization, and continuous learning.

EXPERIENCE

Remote Flutter Team Lead
RentYard Inc.
📅 04/2025 - 05/2025   📍 Dallas, Texas

- Led a remote Flutter team to deliver a complex rental app within a 2-month deadline, applying agile practices and clean architecture to boost development efficiency.
- Solved critical API integration challenges and optimized workflows through strategic planning and clear communication, ensuring on-time delivery.
- Fostered team collaboration and maintained high productivity under pressure, resulting in successful deployment.

Flutter Developer
Team Dev Zero

📅 11/2024 - 05/2025   📍 Dhaka, Bangladesh

- Collaborated with a cross-functional team to develop and maintain Flutter apps using clean architecture and modular design.
- Contributed to feature planning and problem-solving in an agile environment, improving app stability and code maintainability.

Flutter Developer(Project based)
Tech Zone

📅 01/2024   📍 Dhaka, Bangladesh

- Collaborated using existing codebase
- Fixed all bugs and added features and deployed to PlayStore

EDUCATION

BSc. in Geology and Mining
University of Barishal

📅 2019 - 2024   📍 Barishal, Bangladesh

Science Group
Madaripur Govt. College

📅 2015 - 2017   📍 Madaripur, Bangladesh

TRAINING / COURSES

The Complete Flutter Development Bootcamp with Dart by Dr. Angela Yu

Flutter Dart The Complete Guide by Maximilian

STRENGTH

⭐ **Leadership**
Demonstrates leadership abilities while working in teams to achieve project goals

⚙️ **Time Management**
Possesses strong time management skills and a dedication to clean architecture in programming

KEY ACHIEVEMENTS

🎯 **Flutter Project Achievements**
Successfully led and contributed to multiple projects in Flutter, showcasing strong technical skills and teamwork

▶️ **YouTube Achievement**
I made video about bKash integration in Flutter, which has gotten 7.7k views in total

SKILLS

Dart   Flutter   Git   Python   Firebase

Kotlin   Jetpack Compose   Swift   Swift UI

PostgreSQL   Go

Illustrator   Photoshop   Canva   Premiere Pro

After Effects   Capcut

PROJECTS

RentYard

- RentYard is a US-based rental application. The same app will be used for the owner, renter, manager, and utility service provider, which makes the project complex.
- I implement the complex conditional routing system, which is one of the most challenging part of the project

Nectar Beezness

- Nectar Beezness is a ERP system. It has different types of modules, like multiple onboarding for single user, orderable widget like dashboard, scheduling, visit planning, expense management, inventory management, attendance trackers, bill approval, etc.

My BU

- Created an application for University of Barishal students with features like checking bus schedules and getting real-time notifications
- Updated with academic holidays
- Integrated direct calling and emailing to teachers and staff
