SUMMARY

Flutter developer with strong experience in building scalable, cross-platform mobile applications. Proven expertise in implementing clean architecture, working in remote teams, and integrating complex features like payment gateways and real-time notifications. Passionate about UI/UX, performance optimization, and continuous learning.

EXPERIENCE

Remote Flutter Developer

ERAVEND

📅 09/2025 - Present 📍 Wertingen, Germany

- Developed an Android app using Flutter for vending machine management, implementing real-time communication with hardware through Modbus protocol for payment processing, firmware integration, push notification delivery via ntfy integration for operational updates, and streaming from a USB camera

Remote Flutter Team Lead

RentYard Inc.

📅 04/2025 - 05/2025 📍 Dallas, Texas

- Led a remote Flutter team to deliver a complex rental app within a 2-month deadline, applying agile practices and clean architecture to boost development efficiency.
- Solved critical API integration challenges and optimized workflows through strategic planning and clear communication, ensuring on-time delivery.
- Fostered team collaboration and maintained high productivity under pressure, resulting in successful deployment.

Flutter Developer

Team Dev Zero

📅 11/2024 - 05/2025 📍 Dhaka, Bangladesh

- Collaborated with a cross-functional team to develop and maintain Flutter apps using clean architecture and modular design.
- Contributed to feature planning and problem-solving in an agile environment, improving app stability and code maintainability.

EDUCATION

BSc. in Geology and Mining

University of Barishal

📅 2019 - 2024 📍 Barishal, Bangladesh

HSC (Science Group)

Madaripur Govt. College

📅 2015 - 2017 📍 Madaripur, Bangladesh

TRAINING / COURSES

The Complete Flutter Development Bootcamp with Dart by Dr. Angela Yu

Flutter Dart The Complete Guide by Maximilian

STRENGTH

★ Adaptability

I can adapt to any situation, whether it's a new environment or a new technology. I always love to take on a challenge.

Time Efficiency by using AI

I use AI as my code writer, which can write faster but obviously in my way.

KEY ACHIEVEMENTS

Flutter Project Achievements

Successfully led and contributed to multiple projects in Flutter, showcasing strong technical skills and teamwork

YouTube Achievement

I made video about bKash payment integration in Flutter, which has gotten 8.5k views in total

SKILLS

Comfortable with

Dart Flutter Git Firebase Supabase

Familiar with

Python Kotlin Jetpack Compose Swift Swift UI

PostgreSQL Go

PROJECTS

ERAVEND Flutter | Riverpod | Custom Android board

- Built an Android app using Flutter for IoT vending machine custom Android board with hardware integration (Modbus RTU, serial communication), real-time WebSocket notifications, and 15+ language support.
- Implemented payment gateway integrations (PayPal, cash reader, card reader, and QR payment).
- A Flutter mobile app for Android and iOS to operate the vending machine control remotely with WebSocket notifications, device monitoring, and quick-action controls using Riverpod & Dio.

RentYard Flutter | Riverpod | Android | iOS

- RentYard is a US-based rental application. The same app will be used for the owner, renter, manager, and utility service provider, which makes the project complex.
- I implement the complex conditional routing system, which is one of the most challenging part of the project

Nectar Beezness Flutter | Riverpod | Android | iOS

- Nectar Beezness is a ERP system. It has different types of modules, like multiple onboarding for single user, orderable widget like dashboard, scheduling, visit planning, expense management, inventory management, attendance trackers, bill approval, etc.
